

April 3, 2009

Dear Jane and Dennis,

As you know, I bought a Laundry Pure from your company, D & J Enviro Solutions back in June of 2007. For the the purpose of cutting down on the use of all those laundry detergents that I suspected were harmful to my septic system.

More to the point of this letter, I bought my home in December of 2003 and after having a home inspection was informed that I would shortly need to replace my leach field at a cost of approximately \$3,000.00

Rather than dole out the \$3,000 right away I thought I might try a few things. First I bought a product called Septic Helper. I've used the product continuously for the past 5 years with some limited success.

A few months after installing the Laundry Pure, I was walking in my backyard trying to avoid the expected wet area from my misbehaving leach field. To my surprise the fields were dry and have been dry ever since. I can only attribute my good fortune to the Laundry Pure.

I though you would like to know.

Sincerely,

Steve
