

April 3, 2009

Dear, Jane & Dennis

As you know I bought a laundry pure from your Company D & J Clean Air Back in June of 07. For the purpose of cutting down on the use of all those Laundry detergents that I suspected were harmful to my septic system.

More to the point of this letter, I bought my home in Dec 03 and after having a home inspection was informed that I would shortly need to replace my leach field at a cost of approx. \$3000.

Rather than dole out \$3,000. right away I thought I might try a few things.

First I bought a product called septic helper, I've used the product continuously for the past 5 years with some limited success.

A few months after installing your laundry pure I was walking in my back yard trying to avoid the expected wet area from my miss behaving leach field. To my surprise the fields were dry and have been dry ever since.

I can only attribute my good fortune to the laundry pure.

I just thought you'd like to know.

Sincerely

Steve Forgue
